

CIVIL REGISTRY

PARAMETERS

CVLx is an application/challenge deposit – the initial stake of CVL tokens required to launch an application, or to challenge an application.

CVLy is the secondary stake of CVL tokens required to appeal a decision to the Civil Council or to propose a supermajority veto of a Civil Council ruling

DISPx is the "dispensation percentage," aka the percentage of CVLx given to the challenger in a successful challenge, or to the applicant in an unsuccessful challenge.

DISPy is the percentage of CVLy given to the appealing party if a "granted appeal challenge" fails, or to the challenger if it succeeds.
